

Wencon Aggregate & Filler

Wencon Aggregate

General Description

Wencon Aggregate are silica carbide based fine granulates, which are used for both the Wencon Non-Slip surfacing and the Wencon Wear Resistant Coating (see special instructions for use).

Wencon Aggregate is supplied in sets containing 1,5 kg.

Wencon Mixed Filler

General Description

Wencon Mixed Filler is a custom made filler to be mixed with epoxy products.

For jobs, where there is a demand for an extra wear protection and if you need to improve durability,
For extra abrasion resistance, mix Wencon Mixed Filler with Wencon Cream, Wencon Rapid or Wencon Coating.

Mix up to 1 tin (500 ml) Wencon Mixed Filler with 1 kg Wencon Cream, Rapid or Coating.

Before applying the mixture, apply a thin layer of Wencon Cream ,Wencon Rapid or Wencon Coating on the surface (without Wencon Mixed filler). This will increase the adhesion.
